Project Title: Severe Obstetric Complications Electronic Clinical Quality Measure (eCQM)

Project Overview:

The Centers for Medicare & Medicaid Services (CMS) has contracted with Yale New Haven Health Services Corporation – Center for Outcomes Research and Evaluation (CORE) to develop a Severe Obstetric Complications Electronic Clinical Quality Measure (eCQM). The contract name is Development, Reevaluation, and Implementation of Outcome/Efficiency Measures for Hospitals and Eligible Clinicians, Option Period 2. The contract number is HHSM-75FCMC18D0042, Task Order Number HHSM-75FCMC19F0001. As part of its measure development process, CORE convenes groups of stakeholders and experts who contribute direction and thoughtful input to the measure developer during measure development and maintenance. The purpose of the Technical Expert Panel (TEP) is to seek input from individuals with relevant experience and expertise who can provide a variety of perspectives on the development of an inpatient electronic health record (EHR)-based outcome measure used to evaluate hospital-level quality of maternal care for women hospitalized for delivery. The TEP comprises experts in maternal morbidity and mortality, patient/caregiver experts with maternal morbidity experience, experts with experience identifying and abstracting data/health information from the EHR, and experts in performance measurement, quality improvement, health purchasing, and healthcare disparities.
