

Electronic Clinical Quality Measure (eCQM) Development and Maintenance for Eligible Clinicians (EC) Technical Expert Panel (TEP) Membership List

Project Title: Electronic Clinical Quality Measure (eCQM) Development and Maintenance for Eligible Clinicians (EC)

Project Overview:

The Centers for Medicare & Medicaid Services (CMS) contracted the American Institutes for Research (AIR) and its partners to develop, electronically specify, and maintain eCQMs for eligible clinicians for potential consideration and use in CMS quality programs. The contract name is Electronic Clinical Quality Measure (eCQM) Development and Maintenance for Eligible Clinicians (EC). The contract number is 75FCMC18D0027. As the organizer of this TEP, AIR convenes groups of stakeholders and experts who contribute direction and thoughtful input on their work and analysis. The TEP is a collaborative advisory body of approximately 10–15 individuals who represent a broad range of technical experts and stakeholders, including, but not limited to, patients, caregivers, patient advocates, clinicians, electronic health record vendor representatives, quality improvement experts, and health system representatives. The objective of the TEP is to provide input on the prioritization and development of eCQMs that support CMS's quality program goals throughout the development lifecycle.
